

## Easy Web Authoring!

KompoZer is a complete web authoring system that combines web file management and easy-to-use WYSIWYG web page editing.

KompoZer is designed to be extremely easy to use, making it ideal for non-technical computer users who want to create an attractive, professional-looking web site without needing to know HTML or web coding.

## Linux users

KompoZer is a GTK application, it has nothing to do with KDE — though it can be installed on KDE, too. Komodo and the Kernel aren't KDE applications either. ;-)

KompoZer 0.7.10 is not compatible with GTK ≥ 2.14, hence the crashes on some recent Linux distros like Ubuntu 8.10 and 9.04. Please upgrade to [KompoZer 0.8](#).

## Contribute!

Developers, translators, testers: please visit [kompozer.sf.net](http://kompozer.sf.net) if you want to contribute to this project.

If you like KompoZer, please consider [making a donation](#) to support this project.

The current development needs your donations to keep going!
